The 5th meeting of an informal club „Kidney Tumor Friends“ will be held this year in Plzeň, Czech Republic again

We have changed the format of the meeting this year to a lectures and slide seminar (multihead microscope). Lectures will focus mainly on diagnostic problems in general GU pathology with emphasis on rare and new renal, urothelial, prostatic, and testicular tumors and pseudotumors. Due to the limited capacity of the auditorium, registration will be limited to a maximum of 120 participants. Slide seminar will be limited for maximum of 29 participants.

Accommodation will be not provided by organizers, suggestions for hotels in Plzen will be posted on our webpage as well as basic information about location of meeting and about city of Plzen ([www.patologie.cz](http://www.patologie.cz)).

We are aware of current pandemic COVID situation. So far, seems that October could be safe, however we can't guarantee this date. In- case, that meeting will be postponed, we will announce new date as soon as possible.

We are looking forward to welcoming you in Plzeň, Czech Republic.

Prof. MUDr. Ondřej Hes, PhD. and Prof. MUDr. Michal Michal
